

I claim:

1. A box body having a grating comprising  
a plurality of side faces, at least an upper cover face and at least a lower cover  
face, said side faces, said upper cover face and said lower cover face forming at least  
5 a receiving space, at least two of said side faces of said box body having the grating,  
which faces outside said box body, said side faces having the grating comprising an  
image layer, said image layer being capable of displaying movable images or  
three-dimensional images via the grating, at least one of said side faces of said box  
body having an anti-piracy region.
- 10 2. The box body having a grating as claimed in claim 1, wherein all said side faces of  
said box body have the grating and the grating faces outside said box body.
3. The box body having a grating as claimed in claim 2, wherein said upper cover  
face and said lower cover face have the grating.
4. The box body having a grating as claimed in claim 1, wherein at least a shock  
15 absorption pad is provided in said receiving space.
5. The box body having a grating as claimed in claim 4, wherein said shock  
absorption pad is placed on said lower cover face.
6. The box body having a grating as claimed in claim 1, wherein at least one of said  
side faces of said box body has a barcode image layer, and the region opposite said  
20 barcode image layer has no grating.
7. The box body having a grating as claimed in claim 1, wherein said box body is  
used to pack a liquor bottle.
8. The box body having a grating as claimed in claim 1, wherein said anti-piracy  
region adopts a grating with interlaced striations.
